CLOUD BACKUP

2M can automatically send your backups to the most known and reliable cloud storage services, to easily have online backups on Google Drive, Amazon S3, Azure Storage, OneDrive or Dropbox, with zip compression and AES 256 bit encryption.

BACKUP OF ALL DATABASES

2M is a powerful and easy-to-use backup software for Oracle, MySQL, MariaDB, PostgreSQL and SQL Server. It can make automatic backups, it supports compression and encryption of backup files and copying of backup files to any destination.

OPEN FILE BACKUP (VSS)

2M can copy any file that is open or locked by other programs, thanks to its Volume Shadow Copy functions. This feature allows you to do hot backups of Outlook files (.pst), virtual machines, mail databases, etc.

DRIVE IMAGE

2M can create images of the whole disk, to allow you to automatically reinstall the system in a few clicks (bare metal restore). The disk image is made without any interruption or reboot (hot backup), and you can also restore it to dissimilar hardware.

BACKUP OF VMWARE ESXI

A simple, lightweight and powerful VMware ESXi backup software. Compatible with ESXi 4.x/5.x, hot backup without needing to turn off virtual machines, backup to network and tape, one low-cost license for unlimited servers and virtual machines.

DISK BACKUP / NETWORK

2M can copy files and folders to any mass storage device, like NAS, external USB drives, RDX devices, computers in the network. Zip 64 compression, AES encryption, synchronization, and possibility to keep incremental backups.

FTP BACKUP / SYNC

2M is a flexible and lightweight software to make multiple FTP transfers, to and from unlimited servers. You can make FTP backups in both Upload and Download directions, with zip compression, FTPS, AES encryption and bandwidth limitation.

TAPE BACKUP

2M is an agile and powerful software to backup your data to any tape drive (LTO, DAT, etc.). Compression, password protection with AES encryption, automatic tape ejection, restore of individual files.

WEB CONSOLE

Thanks to this useful service, a company or a reseller can monitor the backup of all the computers where 2M is installed, through a user-friendly and centralized web console.

- Installation as Windows service
- Running of multiple and parallel backups
- Detailed reports
- Running of external scripts, processes and files, before and after the backup
- Chaining of backup jobs
- Special variables to easily customize paths and settings
- Unlimited backup jobs, unlimited source items, unlimited destinations
- AutoUpdate through internet
- Automatic authentication on network shares
- Planned and automated execution of each backup job
- Inclusion and exclusion filters based on file extensions
- Automatic computer shutdown after backup

THE MOST COMPLETE DATABASE BACKUP SOFTWARE

2M is a simple and complete backup software for all the major databases. With only one Advanced DB license (210 \$) you can back up unlimited databases to any destination. You can back up MySQL on Dropbox or NAS devices, make SQL Server backups on Azure Storage or FTP and schedule automatic and parallel backups keeping multiple copies of files and databases.

- ✓ Live backup, without any interruption or database lock
- ✓ Backup schedule based on days and times
- ✓ Restore over an existing database or creating a new database
- ✓ Integrated compression
- ✓ Web Console to monitor and manage the backups remotely
- ✓ AES 256 bit encryption
- ✓ Multiple accounts and parallel backups of multiple databases
- ✓ Custom backup file names
- ✓ Possibility to keep multiple copies of the backup of each database
- ✓ Backup verification

FOR WHAT'S COMING NEXT

WHY 2M BACKUP?

COMPLETE SOLUTION

You have powerful features like Disaster Recovery (with hardware independent restore), file synchronization to NAS or to FTP servers, backup of all databases, including SQL Server Express and MySQL. The online backup and web console services allow you to create a complete, secure and effective backup strategy.

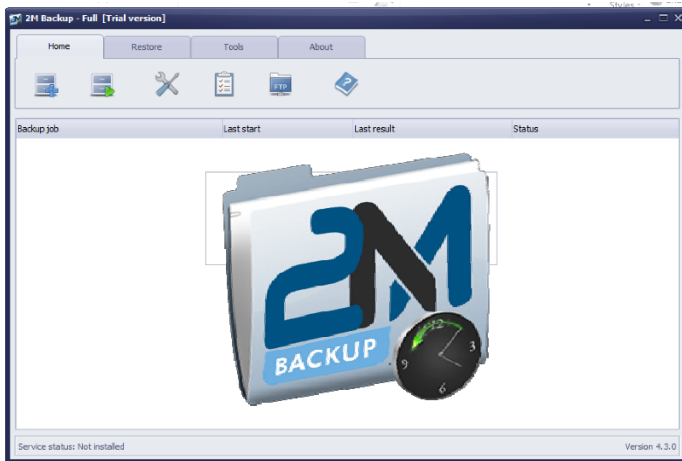

VALUE OVER TIME

Our company has been developing software for over 15 years. Our products and our support service are a guarantee of quality and reliability. By purchasing an 2M Backup license you also have a professional support and consulting service. The license is perpetual and updates are always free.

HIGH FLEXIBILITY

Many options for the best possible configuration: unlimited folders and destinations, open file backup (VSS), filters by file extension and by file size, e-mail notifications, execution of external scripts, compatible with all LTO and DAT tape drives, system recovery, incremental backup, automatic backup.

EASY TO USE.
